Quiz Questions for: Name: ____________________

Unix;

1. What is cygwin?

For each of the following Unix commands, state what the command does and give an example of the command. (HINT: I’ll give you one – man is the unix help command – derived from the word manual. Open cygwin and type man cd to understand what cd does and how it is used – continue this way for the rest of the commands – some will be exceedingly complex – for those, refer to the lecture).

2. cd
3. ls
4. pwd
5. mkdir
6. rmdir
7. touch
8. cp
9. mv
10. rm
11. man
12. tar
13. gcc
14. make
15. vi
16. vim
17. gvim
