ENGE420 - Microprocessors
Project Milestone 2:

Schematic

Create a schematic for your project. You might not have everything figured out at this point, but you should be able to put the Chirps core in place and provide the bulk of your components. For each component, ensure that the Corporate Database has been updated with the Vendor, Part Number, and dated price for each component. When this is completed, you should have a pretty good idea of what needs to be ordered.
